

Research Assistant

As a research assistant, you could get involved in providing key pieces of research that will help us to grow and improve our services. Main areas for research include:

Funding: researching funding sources and possible partners for funding.

Locations: researching different areas we could expand to, and doing a background report on these areas.

Business partnerships: researching potential new businesses/ social enterprises that might be willing to take part in the scheme and offer a discount to ValueYou members.

Charities: Updating our charity directory with non-profit organisations who have volunteers, who we can contact about the scheme.

Plus, other areas you are interested in where you can bring your knowledge and experience! We are a very small team and as such, we are able to give you flexibility in this role and tailor it to your interests.

The time commitment is also flexible, but we would prefer someone who can dedicate at least 3 months to the position and is able to volunteer on a weekly basis.

This is a home-based opportunity, perfect for someone interested in the voluntary sector, grant fundraising, social capital and community links. If you enjoy research and have a good attention to detail we'd love to hear from you!

Please contact Georgie at coordinator@valueyou.org or call 07926 164 827 to express your interest.
